

DITONIALS

EISENHOWER'S NEW ECONOMIES

President Dwight D. Eisenhower's new economic program moved to effect the reduction of a national debt and hopes that it will effect savings of at least \$100 million by mid-1954. The program for this move is made possible since the President is to refrain from calling upon the special session of Congress for the ceiling for the national debt is estimated at \$277,000,000. Mr. Humphrey, that the debt is about \$272,500,000. Humphrey also believes it is about \$277,000,000 end of December.

The majority of opinion seems to be that the President will not cut \$2,000,000,000 from expenditures in the next months. Therefore, it appears that Congress will not pass special session this fall, unless the President makes a sincere effort to avoid enuality and no doubt he support of a vast majority in his efforts.

TERS OF AREA T ON TUESDAY

Members of the area met for district organizational session at the Ox-Bow Restaurant, Hampton road, last night. The meeting was held to make plans for the coming year and discussions were held on the business which will be conducted in the coming year. The meeting was unanimously approved.

J. Cameron of the White House, spoke briefly about the new plan for the coming year. He said that the plan was to have a new plan for the coming year. He said that the plan was to have a new plan for the coming year.

Work, long active in original affairs spoke of the new plan for the coming year. He said that the plan was to have a new plan for the coming year. He said that the plan was to have a new plan for the coming year.

STRENGTH FOR THE DAY

By KARL L. DOUGLASS, D. D.

AN EXCELLENT FORMULA

Are you greatly disturbed over the fact that people do not agree with you? Well, you had better get over it fast because they never will. There will be disagreement in families, among friends, within nations, and throughout the world as long as the world lasts. Only in Russia today does everybody agree—and then only in appearance and because a sword hangs over their unfortunate heads or the gallows casts its shadow across their pathways. In free countries men are strident in their proclamation of disagreement and dissent.

Don't let disagreement bother you—rather let it stimulate you. Think of this free country of ours where we berate our public officials from president down to alderman, where we criticize our preachers, where we talk back to certain learned authorities. If a feature article or editorial offends us, we write a letter. If we don't like the candidates on the ballot we don't bother to go to the polls. We can go to church or stay at home. We can be right or wrong. We can succeed or fail. The glory of our country abides in its combination of unity and dissent.

Here is a good formula. It is old, not original, and very excellent: "Agree to differ; unite to serve; resolve to love." Democracy makes all that possible. Christianity demands it.

Joyce Is Assigned To Special Services

Pvt. Edward F. Joyce, U.S. Army, of Lawrence, who formerly conducted a school of dancing in this town, and who has been serving in the U.S. Army for the past four months, has recently been assigned to the entertainment section of the Special Services division of the 126th Army Service unit affiliated with the First Army. Pvt. Joyce will serve as a dance specialist and choreographer. He completed his basic training at Fort Dix.

Pvt. Joyce, who conducted his own dance studio in Amesbury for the past three seasons, was forced to close his studio earlier than usual this year, when he was called to active service with the Army.

He is anticipating a specific assignment with the entertainment division, following which he expects to enjoy a short furlough. During the furlough he plans to visit many of his friends in Amesbury.

BLOODMOBILE VISIT ON WEDNESDAY, SEPTEMBER 9

With Headquarters In Vestry Of Market Street Baptist Church; Donors May Make Reservations By Calling Red Cross Headquarters

A chance to help children ward off the crippling effects of polio will be given at least 150 Amesbury residents when the Red Cross Bloodmobile comes to Amesbury on Wednesday, September 9th.

Because of the continued success in the use of gamma globulin in the treatment of children and adults believed to have come in contact with polio, the American Red Cross, early this Spring was requested to make an effort in addition to supplying the needs of the men in the armed forces, to also secure sufficient blood through the donations of many people throughout the country to permit the development of a backlog of this important gamma globulin.

Commenting on the forthcoming visit of the Red Cross bloodmobile to Amesbury, Mrs. Max Nagale, chairman of the blood donor committee of the local Red Cross Chapter pointed out that while the actual fighting in Korea has ceased, there will still be a steady demand for blood replacements, for men in hospitals in Korea, and Japan, and in larger hospitals in this country, as well as for surgery that will take place incident to the rehabilitation program of men injured at the front.

"However," Mrs. Nagale continued, "it is this new program of supplying gamma globulin to protect children from paralysis caused by polio that opens up a new humanitarian field of service for all of us, and we of Amesbury chapter are confident that the residents of this community will respond to this new and equally important demand."

Mrs. Nagale explained that gamma globulin is an element in the human blood which contains antibodies that running in the blood stream, help the human body to fight off disease.

Its existence has been known for some time, but its use has been confined largely to the treatment of measles and contagious jaundice. Some two years ago in one of the numerous research laboratories, engaged in determining some method of arresting the ravages of polio, while experimenting with gamma globulin, it was discovered, that a specific quantity, when introduced, had a definite tendency to halt the paralytic effects of this dread disease. Nearly 15 months of intensive experimentation was spent before the medical world would release any information on the subject, and it was not until this spring that its authoritative use not as a cure for polio, but as a means of arresting the horrible paralysis that frequently follows, was suggested.

Because it takes approximately one pint of whole blood to make sufficient gamma globulin for a single injection for a single patient, it is apparent that there is a tremendous need for quantities of whole blood.

"The Red Cross," Mrs. Nagale said, "was asked by the Office of Defense Mobilization in Washington to undertake the gamma globulin program and the Red Cross as usual was only too happy to place its entire organization created for the collection of blood from volunteer donors at the disposal of the government."

On Wednesday, September 9th, from one o'clock in the afternoon until seven o'clock in the evening the Red Cross bloodmobile will be set up in the vestry of the

Market Street Baptist church, ready to receive donations of blood from local residents. This blood will be used first of all, to maintain the constant blood-bank available for local use at the Amesbury hospital. It will be also used to supply the needs of men in the armed services, both abroad and at home, and finally it will be used in the manufacture of gamma globulin, the supply of which is not nearly adequate to meet the need.

Local residents who may wish to donate blood when the bloodmobile is in Amesbury on September 9th, may call the chapter office 1161, for appointments.

YOUNGSTERS GUESTS AT WEENIE ROAST

As Reward For Assistance In Distributing Coin Saver Cards

Twenty-one local youngsters, who assisted the local Lions Club with the distribution of the attractive coin-saver cards, issued by the Amesbury Community Chest, Inc., were guests of the club at a weenie roast and corn boil held at the summer home of Everett H. Locke, North Hampton Beach, last evening.

The youngsters were taken to the scene of the festivities during the afternoon in private cars of the local Lions, where a program of bathing and games were enjoyed. Promptly at six o'clock the guests of the Lions assembled at the huge grill erected at the rear of the lawn about Mr. Locke's summer home, where grilled hamburgers, frankfurts, sweet corn, ice cream and tonic were served in "astounding" quantities to the youngsters and to the members of the Lions Club who joined the party in time for the supper.

Mr. Locke, who was chief cook was assisted by Charles H. Burke, King Lion, Francis Rose, Dr. Bernard Swartz and John D. Hartnett.

The youngsters who attended included Robert Wells, Robert Sanjaon, John Keeley, George Cook, Donald Clouck, David Terry, Kenneth Terry, David Pearson, Gordon Parkman, William Butterfield, Frank Smith, Leo Liberty, William Cole, Roland Peltier, Andrew LeBlanc, Raymond Lawson, Richard Clouck, David Terry, Fred Eaton, William Maurice and John Clark.

At the close of the event, the assembled youngsters gave a rousing cheer for the Lion's Club and a "cheer with a tiger" for Everett Locke, the host of the evening.

Among the visiting Lions attending last night's event were District Governor Robert L. Snow, Wakefield; Deputy District Governor James J. Newburyport; Past District Governor Arthur H. Allan, Merrimack; Raymond Osteen, a member of the Miami, Fla. Lions club, and Basil Marchionni of the Salisbury.

Arthur H. Allan, past district governor, would be the guest speaker at the next meeting of the club to be held at the Ox-Bow Restaurant, South Hampton, Sept. 9. Mr. Allan will show films taken of the International Lions Convention held last month at Chicago.

WORK PROGRESSING ON BAILEY PLANT

Final Drive For Early Completion Of Building

The new plant of the Bailey Company under process of construction on a portion of land formerly on top of the town dump was a particularly busy place yesterday afternoon as the final drive for the early completion of the building was started.

Within the huge building which measures approximately 250 feet by 100 feet, on top of the building and around the sides of the building there were crews of men representing several different crafts at work. Within the building, a crew of the Abernethy Company, precast concrete, was busily engaged finishing the last half of the huge cement floor. Working on the section of the floor poured last week, which is now sufficiently "healed," crews of steamfitters, plumbers and electricians were moving about in a well-ordered confusion, intent on their specific tasks.

Without the building the line crew of the Amesbury Electric Light Company was placing a huge transformer in position. Once this was installed and connected, electricians of the Crasey Company started to string temporary wire about the building to provide illumination for other workers. On the top of the building roofers were engaged in placing the final section of the roof on the structure. The Bailey Company is approximately 25,000 square feet in area, is completely insulated, and because of this will effectively prevent the rays of the sun from penetrating into the interior.

As soon as the entire cement floor is completely laid, a force of electricians employed by the Crasey Company of this town, will begin the task of wiring the building and installing the numerous fluorescent lights of the most modern type.

Once the lights have been installed and power outlets made available work will be started setting up the machinery that will be operated in the new plant. Some of the machinery now occupying space in other plants of the Bailey Company will be transferred to the new location, but most of it will be new machinery, some of which has already arrived in Amesbury.

It is expected that the new plant will be ready for production about October 15th.

SINGLE OVERSHOE FOUND YESTERDAY

The prophets who have been predicting an early winter, were supported in their contention yesterday when a single overshoe, newly new, was found on Kimball road and brought to police headquarters. The police who have been giving some serious consideration to the matter are of the opinion that some person, anticipating the worst weather morning when rain fell briefly, subsequently removed his overshoe and apparently lost one of them.

At the event, a single overshoe can have the same upon application at police headquarters on School street.

One reason people are easy to fool is that few of them really seek out the truth.

INCREASE EXPECTED IN ENROLLMENT IN SCHOOLS

Will Be Approximately One Hundred Larger Than Last Year; New First Grade Established At Horace Mann School

When the school bells sound out over Amesbury two weeks from this morning, it is probable that a few more than 2200 youngsters, spick and span in their new school-togs, will trod along toward the several schools in the community. It is confidently expected by school authorities that the enrollment on the first day of school will be approximately one hundred larger than that tabulated on the first day of school a year ago.

Fred C. English, superintendent of schools, anticipates that the enrollment in the public schools will total 1213 on the opening day of the 1953-54 school season. This figure is an overall increase of 55 from the number which attended a year ago on the first day of school.

Authorities at both St. Joseph's and Sacred Heart Schools, while the enrollment in the public schools at this time, confidently expect increased enrollments of approximately twenty-five in each school. This figure added to the increase in the public schools, indicates the enrollment increase of one hundred in total enrollment.

In the public schools as well as the private schools of the community there are indications that there will be an all-time record enrollment in the first grade. English estimates that there will be 164 first grade pupils on the opening day of school. This figure is a sharp advance over the 138 pupils registered on the first day of school a year ago.

To accommodate the large first grade enrollment, one new first grade room is to be located in the Horace Mann School. This room will be located in the well-lighted, well-ventilated basement of the school. Within the next few weeks the new room will be placed in that section of the Horace Mann basement which has been set aside for the purposes of the first grade. A floor covering of linoleum tile is also being placed in the room. The White Electric Co. of Lowell, has the contract for installing the lights, while the contract for the floor covering was awarded to the Premier Furniture Co. of this town.

In his estimate of the school population for the new school year, English figures that the elementary school population will be 674 pupils. A year ago this figure was 643. The school Superintendent also estimates that there will be an increase in the enrollment at the high school. Here he believes there will be an increase in enrollment due principally to a freshman class enrollment of 191 pupils. The registration at the high school two weeks from today, Mr. English estimates, will be 582 compared with 546, the registration last September.

According to the figures compiled by the school superintendent, the junior high school will be the only school showing a decrease in enrollment. His figures indicate that the enrollment in this school will be 157 pupils. A year ago there were 168 pupils on hand the first day of school.

A tabulation of the pupils which are expected to attend the various grades in the different schools show that practically all of the grades will have more pupils than the highly desired thirty. This condition is likely to be continued until the completion of the 1955-56 school year, when a new school. This new building will house the pupils of the seventh and eighth grades.

Registrations filed to date in the Office of the school department indicate the following enrollments for the grades in the various
